Local and viable farm-to-plate goodness.

*Explore!*

Italian models of sustainability.

*Immerse!*

Amazing on-site learning experiences.

*Interact!*

Visit producers with generations of experience.

# FOOD, SUSTAINABILITY & ENVIRONMENTAL STUDIES

## Why Italy?

Both historically and today, Italy has a tremendous impact on how we eat around the world. It is also at the forefront of promoting the essential links between food and a healthy, sustainable environment. Italy is a natural choice for students who want to explore these subjects in a unique, immersive study abroad program.

## Food Studies

- The Science of Italian Food
- From Literature to Social Media: Reading and Writing Italian Food
- Sustainable Food Production in Italy: Local Traditions and Global Transformations
